- Received numerous **great unsolicited comments from students** on teaching.

SUMMARY OF SERVICE PERFORMANCE

- Served/serving on **six committees at the university level.**
- Served/serving on **26 committees and other activities at the college level.**
- Served/serving in **multiple academic and other activities.**

RESEARCH FOCUS

1. My primary research interest focuses on investigating novel factors that impact tourists' demand for goods and services. Some new factors are push-pull weather, quality of life, health treatment, crowding-out tourist markets, (smart) tourism specialization, households' financial position, money supply, vegetation, economic growth, dengue, and COVID-19. My specialization is in secondary macro rather than microdata, particularly at the country level. I use specialized econometric decomposition techniques to extract new information from the secondary data, mainly cycles and seasonal factors. The newly extracted data offer a good understanding of the short- and long-term dynamics in people's decisions to become tourists.
2. My secondary research interest concerns the factors influencing the hospitality industry's performance, and I focus here, particularly on the restaurant and lodging sectors. Factors researched so far include consumer sentiment, investors' sentiment, risk premiums, the fear index, restaurant sanitation, and financial recovery strategies after COVID-19. I also often use secondary data to extract seasonal and cyclical factors, allowing me to understand short- and long-term impacts better.

RESEARCH PHILOSOPHY (summarized)

Research should be about an ambition to create novelty rather than echoing conventionalism. It is about passion, thinking outside the box, and being creative with each new research endeavor. It is about going the extra mile to better understand problems and contribute to policy-making and theory-building. It should be about freedom to discover rather than an obligation to spread iterations. Research should not only satisfy individual curiosity but should also serve as a vehicle to improve knowledge and advance societies.

TEACHING PHILOSOPHY (summarized)

Teaching is, for me, a dynamic journey. Considering my background principles and persistent changes in the environment, students and I, pose a constant challenge to be alert and reactive to achieve the best results. I value (i) empathy towards students, (ii) cooperation to achieve team players rather than round-the-clock solo-performers, (iii) flexibility to adapt to needs and circumstances, (iv) two-way communication to achieve shared understanding, and (v) mutual respect. I try to use the teaching opportunity and my values to make a lasting footprint on students' experiences.

SERVICE PHILOSOPHY (summarized)

Service is, for me, the way to be thankful for the opportunities and knowledge I relish. It is a way to show that not everything I do has to be for money, and there is an opportunity to achieve a lasting impression on others if we are willing to walk that extra mile. There are many ways to practice service, be it at the college, university, academic business, and general community levels.
